

Technologies and Languages

- Languages: JavaScript, HTML, CSS, SQL, Typescript
- Frameworks and Libraries: React, Tailwind, Redux, Material UI, Node.js, Express, Mongoose, Sequelize, Jest
- Databases: MySQL, MongoDB
- Tools: Postman/Insomnia, Github, VSCode, Heroku, AWS

I'm a Full-Stack developer with an enthusiasm for building web applications that make a difference. I spent a decade in the United States Air Force prior to becoming a developer and am eager to provide value to any team I join.

Projects

PROShop (e-Commerce)

- Architected and implemented a dynamic and responsive e-Commerce platform using the MERN (MongoDB, Express, React, Node.js) stack.
- Engineered RESTful API, including authentication middleware via JSON Web Tokens.
- Developed user-centric features such as reviews and product recommendations.
- Implemented responsive design to enhance both web and mobile user experiences.

Kurstie's Kookies (e-Commerce)

- Collaborated with 5-member team through SDLC during three-week collaborative project.
- Designed and developed RESTful API using Node.js and Express.
- Integrated API with MySQL via Sequelize.
- Led UI/UX design efforts, utilizing Handlebars.js for rendering and Bootstrap for responsive styling.
- Deployed via Heroku.

Healthcare Hotspot

- Web application used to find healthcare providers in specific zip-codes.
- Integrated third-party APIs via vanilla JavaScript.
- Operated in an Agile environment, leading daily stand-ups to ensure on time project completion.
- Utilized Bulma CSS framework for responsive styling on web and mobile.
